Experience Summary

- **Senior software developer**
- **6.2 years of IT experience**
- **Up to 3 roles in project, with different domain like finance, tobacco, insurance**
- **Project development from scrap to end, by work on Different SDK / frameworks.**
- **Work on all platforms like web app, web API**

Skills Summary

Domain	Finance, Insurance
Programming Languages	C# .NET (.Net Core Web API, ASP.net MVC), Angular (versions 5,8,10,12) ,SQL, Bootstrap, HTML, AJAX, JQuery,ADO.Net
Operating System / ERP Version	Windows ,8,10
Tools / DB / Packages / Framework / ERP Components	Postman, MS Office, MS SQL Server 2008 and above, .NET Core WEB API, .NET framework 3.5 and above, Visual Studio (2012,2015,2019), Azure DevOps, VSS,TFS
Hardware Platforms	Intel Series

Professional Certifications/ Trainings

Attended various trainings on .NET framework 3.5,4.0, ASP.NET MVC, .Net Core WEB API, JQuery, Angular 10, Azure DevOps Git

Work Experience

Project 1

Project Name	Data Reliability	**Team Size**	4
Start Date	Jun 2022	**End Date**	Nov 2022
Project Description	Data Reliability make Utilities data more accurate, consistent, relevant and trusted, that will drive effective information delivery across the entire enterprise, higher business performance and will enable cutting-edge		

	innovation
Role & Contribution	• Involved in coding based on requirement specification • Responsible for designing single page applications and consuming the ASP.NET Core WEB API in Angular 12 • Involved in writing test cases for the application using Simon Test tool • Involved in PowerBI integration in angular application • Implemented Angular routing in several modules • Fixes bugs as raised by the QA in azure devOps
Technology & Tools	Angular 12, Visual studio code, Azure DevOps

Project 2

Project Name	**LeadsManagement**	**Team Size**	10
Start Date	May 2019	**End Date**	Mar 2022
Project Description	Leads Management (CRM) make Agents feel special by engaging them with a dedicated workspace tailored to their needs, keep your agent workforce updated on current statuses, filters, global search, provide secure access to agent's access to the material that Agents required. Easy search to find relevant content		
Role & Contribution	• Involved in designing and coding based on requirement specification • Programming of new modules as per business requirements • Responsible for designing single page applications and consuming the ASP.NET Core WEB API 3.1 in Angular10 • Developing queries and stored procedures • Resolved application defects and issues in a timely manner • Performing code reviews and provide necessary corrections		
Technology & Tools	C#.net, Angular 10,ASP.Net Core 3.1, Visual Studio, Sql server, Azure Devops Git		

Project 3

Project Name	BIZDYNAMICS Essentials	Team Size	10
Start Date	Sep 2019	End Date	Aug 2020
Project Description	BizDynamics Essentials have 3 internal portals which is agents, customers and employees, by engaging them with a dedicated workspace tailored to their needs, provide secure access to entire book which includes customer and contract information, provides instant access to the material that Agents requires. Easy search to find relevant content.		
Role & Contribution	• Involved in designing and coding based on requirement specification • Responsible for designing single page applications and consuming the ASP.NET Core WEB API 2.1 in Angular8 • Implemented View , Models and bindings for UI in Angular. • Implemented Angular routing in several modules • Involved in Bug fixes and new Enhancements • Programming of new modules as per business requirements. • Developing databases including queries and stored procedures • Resolved application defects and issues in a timely manner • Conducted manual testing. • Monitoring application performance at post-deployment stage and make necessary changes if needed • Performing code reviews and provide necessary corrections		
Technology & Tools	C#.net, Angular 8,ASP.Net Core 2.2, Visual Studio, Sql server, TFS		

Project 4			
Project Name	MHQ App Support	Team Size	5
Start Date	Jan 2019	End Date	May 2019
Project Description	MHQ shopping application enables adult smokers 21 years of age or older, who are enrolled in the Marlboro Rewards program, to scan and enter reward codes found on their packs for points. These points may be redeemed in the application for rewards. MHQ also simplifies the mobile coupon experience for adult smokers 21+. Adult smokers 21+ can easily access mobile coupons on their phone and locate a store where they can		

	redeem the coupon. Push notifications can be turned on to receive reminders of when mobile coupons are available for use. Only one mobile coupon may be redeemed per day, per eligible smoker 21 years of age or older. Mobile coupons are void in MA and where prohibited and subject to change or cancellation without notice
Role & Contribution	• Involved in coding part in Angular 5 and MVC 5.0 • Analyzing business and functional requirements • Programming of new modules as per business requirements. • Resolved application defects and issues in a timely manner • Monitoring application performance at post-deployment stage and make necessary changes if needed
Technology & Tools	C#.net, Angular 5, Visual Studio,ASP.Net MVC, Git

Project 5			
Project Name	**Finsoft Management System**	**Team Size**	4
Start Date	Oct 2016	**End Date**	Dec 2019
Project Description	FINSOFT Is totally synchronizes the data of branches online and reports across branches can be generated instantly. Defaulters list, Guarantors information, Customer- wise ledger, Agent- wise Business, Balance Sheet, and Profit & Loss Statement etc. can be generated at any point of time. All these will lead to effective usage of technology, quality and accuracy in information and image among Customers and simplifies the process for team members. FINSOFT Web-based ERP Application is a new generation software solution, which offers great flexibility, transparency, complete control, and yet very easy to use. It comes with latest technology, which offers provision for direct interaction to customers, Online Collections, SMS integration, Mobile connectivity. The Finsoft is a Ideal Software Solution to NBFC is a Complete Loan Management and Accounting Solution		
Role & Contribution	• Involved in Designing and coding part in Asp.net MVC4.0 • Involved in bugs fixing and resolving • Involved in the maintenance of the application		

	during production phase • Involved in writing stored procedures, functions, cursors, views • Analyzing business and functional requirements • Part of development team to develop integrated ASP.NET MVC applications • Developing databases including queries and stored procedures • Monitoring application performance at post-deployment stage and make necessary changes if needed • Works collaboratively with Team Lead and Project Manager to ensure timely delivery of project
Technology & Tools	C#.net, jQuery, Visual Studio, Asp.Net MVC, SQL server, VSS

Other Experience

Title			
Start Date		**End Date**	
Role & Contribution			

Educational Qualification

Education & Credentials	Bachelor of Degree in Electronics and Communication (B.Tech) in 2015.
